ORGATEX Plastic Parking Slots

Parking Slot

The new plastic Parking Slot from ORGATEX is a simple tool to economically store carts and dollies in a space saving manner. In keeping with 5S principles they ensure every cart has a home and prevents unintentional movement from that location. Some features include:

- self-adjusting slot to the wheel diameter
- allows easy blocking of any rolling device
- ready to use due to the peel-and-stick industrial adhesive on the back
- easy to cut

The contact area of the parking slot adjusts itself automatically to the wheel diameter.
